

## OS-1 Bulletin

March 14, 2002

It has come to our attention that we have received a bad batch of OS-RAD wire harness from our supplier. You can identify if you have the correct harness by the diagram below. By looking at the plug from the wire side with the clip on top, look at pin#1...

If pin#1 has a RED wire, you have the correct wire harness and you do not have to do anything special. Wire the OS-1 as instructed with the supplied instructions.

***If pin#1 has a BROWN wire, you do NOT have the correct wire harness. Please contact PAC so we may send you a correct wire harness for the OS-1. Please throw away the incorrect OS-RAD as it is not compatible with any of our products.***
